

Tracking Carbon Emissions

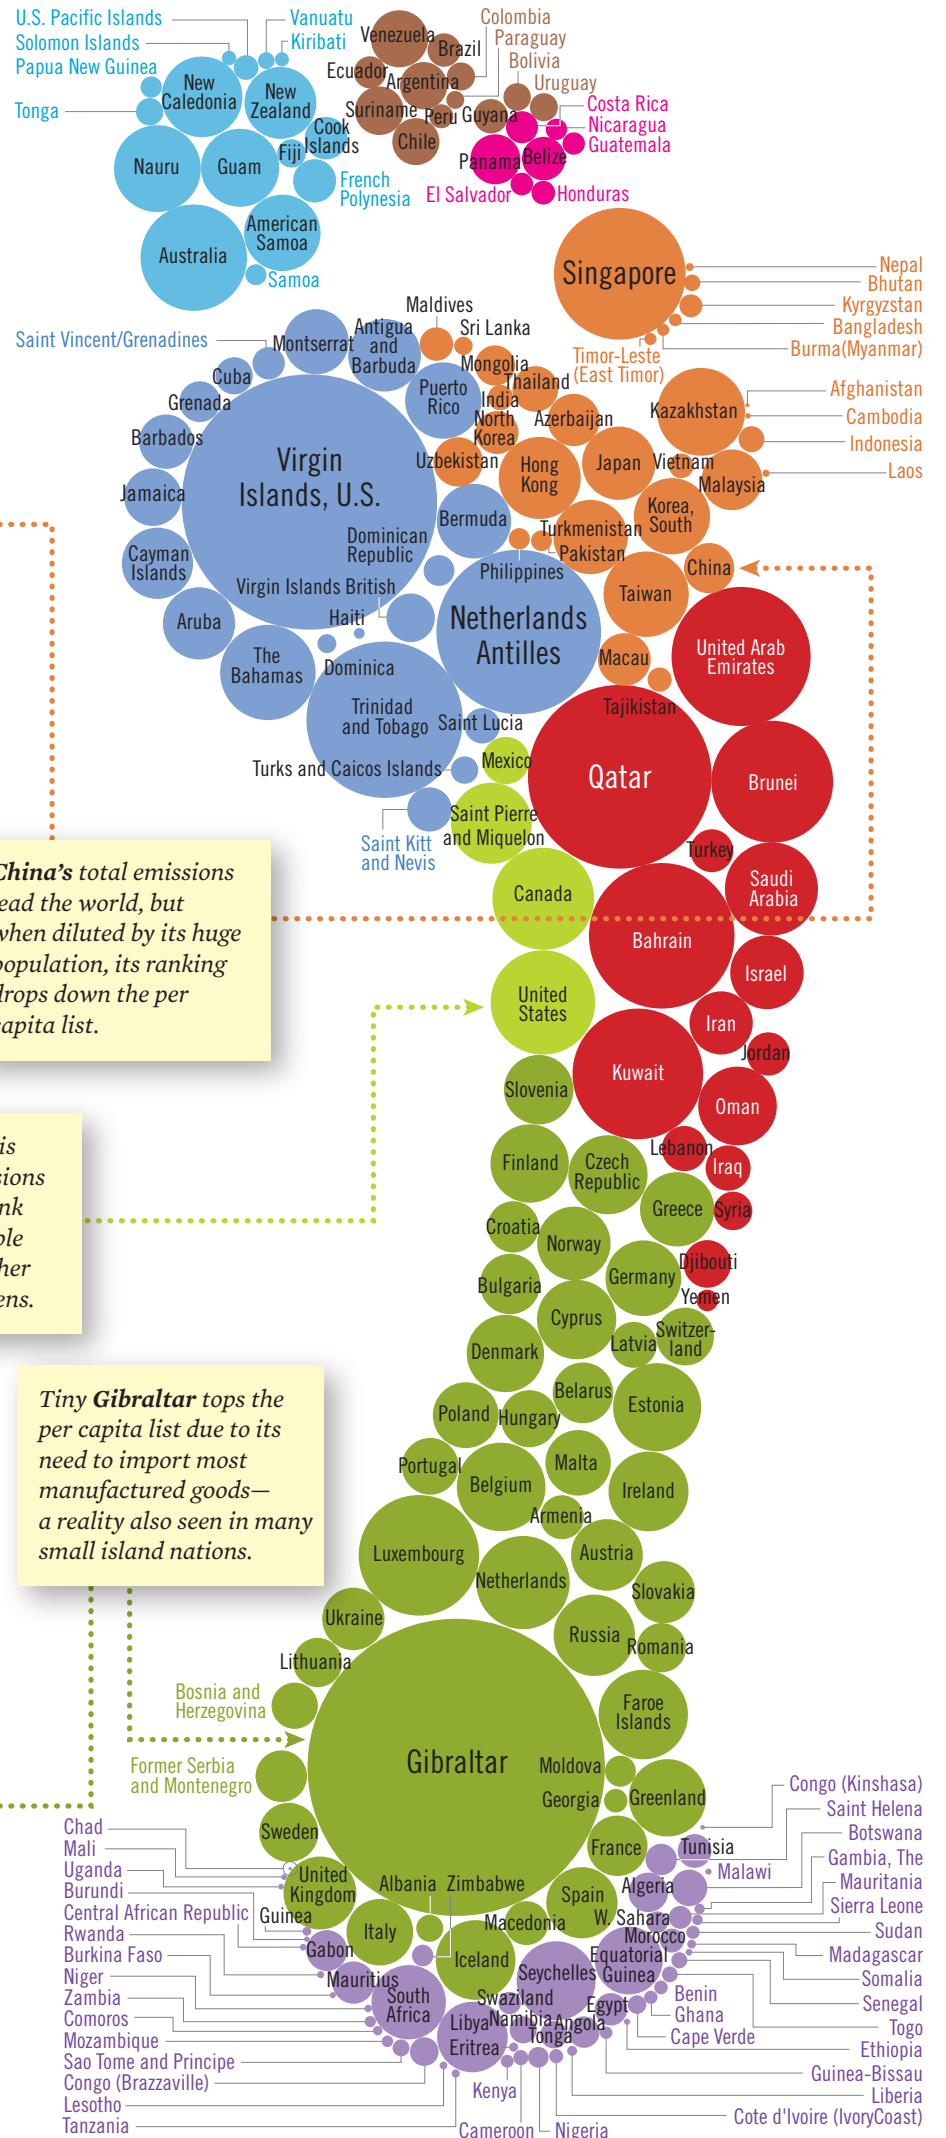

A footprint comparison of total carbon dioxide emissions by nation and per capita shows there's plenty of room for smaller countries to reduce their carbon footprints.

By Stanford Kay

Total Carbon Emissions by Nation

Per Capita Carbon Emissions by Nation

China's total emissions lead the world, but when diluted by its huge population, its ranking drops down the per capita list.

The United States is no. 2 for total emissions but Americans shrink down to a respectable rank in line with other industrialized citizens.

Tiny Gibraltar tops the per capita list due to its need to import most manufactured goods—a reality also seen in many small island nations.
